DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/16/03 (Paper No. 13) has been entered.

Election/Restrictions

2. Pending Claims 3 and 4 are directed to an invention that is independent or distinct from the invention originally claimed for the reasons set forth in Paper No. 9

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, Claims 3 and 4 continue to stand as being withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3729

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hata et al 5,778,525.

Hata discloses a machine comprising: a transport device (board transfer means 22 in Fig. 3); at least one feeder area (region above component supply table 28A) with electrical components (see Fig. 2); two Y-slides (mounting head sections 31), each of which are independently drivable in an X-direction (see Fig. 3); at least two placement heads (nozzles 33) on each of the Y-slides with each of the placement heads moving simultaneously in the X-direction and are independently drivable in a Y-direction (see arrows surrounding the head sections 31 in Fig. 3), which meets all of the limitations of the claimed machine.

Response to Arguments

5. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. Dexter Tugbang whose telephone number is 703-308-7599. The examiner can normally be reached on Monday - Friday 7:00 am - 3:30 pm.
